WHO WE ARE AND WHAT WE DO

The Creation-Science Society of Milwaukee (CSSM) is an educational, nonprofit Wisconsin corporation. Our purpose is to show the superiority of the creation view of origins over the evolutionary view. We sponsor free monthly programs for the public from September through April; periodically we conduct seminars. We invite you and your friends to attend them. Monthly fliers giving information about our programs are sent to those on our mailing list.

No one who works for CSSM receives any remuneration for his or her services. Funding for our printing and postage costs, honorariums and travel expenses for outside speakers, film/video rentals and other expenses comes from our annual membership dues, contributions and book sales. Membership dues and gifts to CSSM are tax deductible.

OUR CONCERNS

It is our goal to present a scientifically and biblically sound view of origins that most people are not normally exposed to in our public school systems or through the general media.

Our programs show that the creation view of origins is supported by the abundance of scientific and historical evidence. For that reason the creation view is superior to the evolutionary view of origins.

CSSM endeavors to foster a climate in which people are free to make their own decisions regarding the origin and age of the universe, the earth, all life, living creatures and human beings.

OUR VIEWPOINT

We believe that the data from the following fields of study correlate better with the biblical view of origins than with the hypothesis of evolution. For example:

MOLECULAR BIOLOGY AND GENETICS The information content of the DNA molecule (the genetic code) in the nucleus of the biological cell must have been provided by an intelligent Being--God, the Creator. Information never arises from non-intelligence. Each kind of organism is programmed genetically to produce its particular kind of living creature. Mutations are generally useless or harmful; they are not mechanisms for changing a reptile, for instance, into a bird. Natural selection usually eliminates any effect mutations might have on a species.

GEOLOGY The earth's geological features are consistent with the Flood recorded in Genesis chapters 6-8. With the flood, great geological changes occurred within a very short time. The hypothesis of an earth billions of years old rests upon assumptions that are not scientifically valid.

PALEONTOLOGY Neither fossils nor present-day organisms possess transitional features which show that one type of organism evolved into another. The fossil evidence supports the view that organisms have always existed according to distinct types or kinds as Genesis 1 states.

PHYSICS The first and second laws of thermodynamics, which deal with mass/energy and entropy, are consistent with the biblical view of origins; they give no support to the idea of a self-generated universe or self-generating organisms.

ASTRONOMY The complexity and structure of the universe as known from space exploration and astronomy cannot be the result of random processes, but indicate the existence of a Designer external to the universe.

HISTORY It is commonly acknowledged that human civilization is very young. The beginnings of the Sumerian and Egyptian civilizations date back no more than five to six thousand years ago, which correlate well with Genesis 10-11. The many existing flood traditions are witnesses to the reality of the Genesis Flood. In the light of all scientific and historical data, Genesis 1-11 is a very credible historical record.

Neither Creation nor the Flood can be repeated and researched directly; however, a study of nature discloses that there had to be a Creator and there once was a universal flood.

WHY WE CARE ABOUT ORIGINS

We care about origins because we want people to know the truth. As Jesus said "...You shall know the truth and the truth shall make you free" (John 8:32).

How people understand their origin affects the way they think as well as the nature of the society in which they exist. Persons who see themselves and the world as products of God's creating power and caring concern feel a sense of responsibility to Him; they live and function differently from those who see themselves merely as the products of evolutionary development. The social environment in which a person lives is conditioned, in part, according to the prevailing view of man's origin--for better or for worse.

OUR SERVICES

In addition to sponsoring lectures, we offer the following services:

- Books relating to the creation view of origins are available for examination and purchase at our programs.
- Speakers are available to present various topics relating to creation and the Genesis Flood.
- Several videotapes relating to Genesis 1-11 and science are available.
- Children's science workshops
- Creationist field trips to geological sites
